Statistical Test Results

metric	control_rate	treatment_rate	lift_%	p_value	stat_significant
Gross Conversion (Cart Add Rate)	0.23	0.21	-9.91	0.0000	True
Net Conversion (Purchase Rate)	0.13	0.12	-7.14	0.0022	True

RECOMMENDATION: DO NOT LAUNCH

RECOMMENDATION: DO NOT LAUNCH

Cart Add Rate: 23.05% → 20.77% (−9.91% lift)

Purchase Rate: 13.08% → 12.15% (−7.14% lift)

Both metrics statistically & practically significant (p < 0.05)

Sample: 47,277 users | Duration: 31 days | Alpha: 0.05

The simplified checkout reduced both cart additions and purchases.
Likely removed trust signals that motivated purchase completion.
Next step: Redesign with trust elements retained.
